## MANAGED EMAIL SECURITY

WE FIGHT CYBERCRIME. WE PROTECT HUMANITY.

### KIVU'S MANAGED EMAIL SECURITY

Reduce your risk from phishing, malicious e-mail attachments, and business email compromises with Managed Email Security and Awareness from Kivu. Our solution provides peace of mind, education for your users, and more! All managed by the security experts at Kivu.

#### Key capabilities of our email solution include:

- ✓ **AI Computer Vision**  
Self-adapting AI algorithms and a deep understanding of email works, including over two-dozen vision and text analysis models, provide a higher degree of confidence than legacy rule-based email security models.
- ✓ **Social Graphing**  
The solution uses deep learning to get to know users, their contacts, and their email behaviors to detect impersonation attempts on someone within or external to the organization.
- ✓ **Informational Banners**  
Color-coded banners on every email offer threat assistance and advice to employees in real time.
- ✓ **Mobile Protection**  
Email protection works across any device and any email client.
- ✓ **Operational Quarantining & Approval Workflows**  
For organizations that want more customized administrative workflow, Kivu can configure email quarantines, block emails, or send emails to managers or admin for review approval.

✓ **Customizable Configuration**

You have complete control over risk levels and how your employees interact with the solution.

✓ **Powerful Reporting**

Identify trends or analyze the details. Our solution makes it easy to dive deep as well as build reports for your executive team.

✓ **Easy Setup**

There are no gateways or mail processing systems that need to be configured. Our cloud-based solution integrates easily with Exchange, O365, and Gmail without the need to mess with complex configurations.

## Email Security Packages Overview

---

Kivu's Email Security services are offered a la carte or as bundled packages. Our email security packages are designed to meet specific needs, risk profiles and budgets without hidden costs or extra charges.

### Kivu's Email Security Packages:

#### Essentials

Built with a focus on inbound email security including phishing detection and attachment malware analysis.

#### Professional

Targets additional needs for organizations with lower risk tolerances, this package adds internal and outbound email protection including email behavioral profiling, account takeover detection, and outbound data loss prevention.

#### Enterprise

Built for organizations with email compliance and productivity requirements. This package adds email encryption capabilities and graymail detection. In addition, online **Security Awareness Training** and **Phishing Simulation** is available to add to any email security package.
