

KIVU

CYBERCERTAINTY MANAGED XDR

WE FIGHT CYBERCRIME. WE PROTECT HUMANITY.

PROACTIVELY STOP SECURITY THREATS IN THEIR TRACKS WITH CYBERCERTAINTY

Quickly identify and respond to endpoint, network, and other threats in real time with leading technology combined with Kivu threat experts.

WHAT IS CYBERCERTAINTY MANAGED XDR?

Extended Detection and Response (XDR) starts with strong endpoint protection and extends that protection with integrated visibility, threat intelligence, and automated response across various attack paths such as network, e-mail, identity, cloud, and endpoint.

This provides a unified and holistic capability to identify and address advanced modern threats across an organization's tech stack enabling stronger security and business outcomes.

KEY BENEFITS OF CYBERCERTAINTY MANAGED XDR

✓ **Extended Visibility**

Go beyond endpoint data, including providing a holistic detection and response solution, integrating into key points across your network, cloud, identity, and e-mail environments. This broader perspective helps identify and both automatically and manually respond to threats that might otherwise slip through the cracks.

✓ **Actionable Threat Intelligence**

Sourced from Kivu's incident response team, our technology partners such as CrowdStrike and Lumu, and open source, the intelligence built into our solutions enables us to prioritize threats more effectively and respond faster.

✓ **Better Alert Prioritization**

Our experience in incident response and security operations, combined with AI based threat analytics, enables us to better filter out false positives and prioritize the most important alerts, allowing you to focus on what matters.

✓ **24/7 Threat Detection and Response**

Security professionals are in high demand in short supply. Kivu's experts manage and monitor your security stack around the clock, providing for swift detection and response to potential threats.

✓ **Reduced Costs**

Building and maintaining an in-house SOC is prohibitively expensive. Kivu's managed solution offers a cost effective way to get access to advanced security capabilities without needing a large internal team.

✓ **Improved Cyber Resiliency and Insurability**

Reduce cyber risk and improve organizational resiliency through cutting edge technology and integrated response automation, managed and monitored by the experts. Reducing cyber risk through the technology available within Kivu's Managed CyberCertainty XDR along with our 24x7 monitoring will also improve your cyber resiliency and may even lower your premiums.

INTEGRATIONS

Our XDR technology partners integrate with much of your current IT to collect data to support identification of threats and to proactively respond. We support over 50 integrations natively within our managed XDR solutions.

Some examples include:

- ✓ **Endpoints:**
Windows, Linux, Mac, Mobile, and more
- ✓ **Identity/SSO:**
Active Directory, Microsoft Azure Active Directory, Okta, Ping, Forgerock
- ✓ **Network:**
Cisco, HP, Meraki, or any network device that supports Neflow or Syslog.
- ✓ **Firewalls:**
Checkpoint, Cisco, Fortinet, Juniper, Palo Alto, Sophos
- ✓ **Cloud:**
AWS, Google, Azure, Kubernetes
- ✓ **Security Gateways and Secure Services Edge:**
Cisco, Cloudflare, Netscope, McAfee, Zscaler, Menlo
- ✓ **E-mail:**
Microsoft 365, Google, Mimecast, Proofpoint, Cisco, Abnormal
- ✓ **EDR:**
CrowdStrike (Included with CyberCertainty Managed XDR), Defender, SentinelOne, Sophos, Trend Micro

By extending CyberCertainty Managed XDR with Kivu's Managed SIEM, additional and customized integrations can also be included in our solution.

SERVICE OPTIONS

Kivu's CyberCertainty Managed XDR service is offered to our clients via service packages which are tailored to specific needs, risk tolerances, and budgets without hidden costs or extra charges. Clients may also build a customized service package or add on to any package as desired.

KIVU CYBERCERTAINTY MANAGED XDR PACKAGES

Essentials:

- Extended Detection and Response (XDR) including:
 - Advanced Endpoint Detection & Response
 - Network Detection & Resposne
 - Email Security Integration
- 24x7 Threat Hunting & Monitoring
- Full Platform Management & Support

Professional:

Everything in Essentials, plus:

- Identity Threat Protection
- Vulnerability Management
- Asset & Attack Surface Management
- Enhanced Threat Hunting

Enterprise:

Everything in Professional, plus:

- Deep and Dark Web Monitoring
- Advanced Endpoint Controls (Firewall, Device Control)
- Data Protection
- Advanced Identity Threat Protection
- Customized Threat Hunting

Optional Modules: (able to be added to any package)

- Cloud Detection & Response
- Mobile Device Security
- Denial of Service Protection
- Web Application Firewall
- Customized Log Sources/SIEM/Extended Data Retention
- Additional XDR Connectors
- File Integrity Monitoring

THE TECHNOLOGY YOU GET

Kivu's CyberCertainty Managed XDR service is powered by the following technology partners:

				
<ul style="list-style-type: none">• Falcon EDR• Insight XDR• Identity Threat Protection• Cloud Detection and Response• SIEM• Device Control• Host Based Firewall Management• Mobile Device Protection• Data Protection	<ul style="list-style-type: none">• Network Detection & Response• Network XDR Integrations	<ul style="list-style-type: none">• Vulnerability Scanning	<ul style="list-style-type: none">• Asset and Attack Surface Discovery & Management	<ul style="list-style-type: none">• WAF• Network & Application DDoS Protection

KIVU MANAGED SERVICES WHITE GLOVE SUPPORT

Have questions or want to schedule a demonstration? Contact us at info@kivuconsulting.com.

Our service experts are available to you 24x7 to ensure you're achieving the security outcomes needed to support your business.

CONTACT US

Kivu is a leading global cybersecurity firm that offers a full suite of pre- and post-breach services, specializing in the forensic response to cyberattacks and ransomware incidents. We deliver cutting-edge solutions to organizations worldwide.
